## SUMMARY

Computer Science undergraduate skilled in Java, JavaScript, and backend development using Node.js. Proficient in problem-solving, Object-Oriented Programming (OOP), and DBMS, with a keen interest in learning new technologies and applying technical knowledge to real-world software projects. Looking for an entry-level Software Engineering role to effectively contribute to a dynamic development team.

## SKILLS

**Languages:** Java, JavaScript

**Web Technologies:** HTML, CSS, Node.js, Express.js, React.js

**Databases:** MySQL, MongoDB

**Tools & Platforms:** Git, GitHub, VS Code, Postman, Firebase, Redux, Stripe, Cloudinary, Mailtrap

**Concepts:** REST API Development, Authentication & Authorization, Data Structures & Algorithms, Agile / SDLC

**Coursework:** Database Management System (DBMS), Object-Oriented Programming (OOP)

## PROJECTS

### Habit Tracker Website

github.com/aman-9887/Habit-Tracker

- **Technologies:** HTML, CSS, React.js, Firebase
- Engineered a Snapchat-inspired streak system that automatically increments daily streak counters upon task completion and resets on missed days, driving user engagement and retention.
- Implemented secure login with Firebase Authentication and real-time cloud sync to persist streak data and habit logs across multiple sessions and devices.
- Built an interactive progress dashboard with visual streak indicators, enabling users to track consistency and long-term habit performance.

### Food Ordering Web Application

github.com/aman-9887/Food-Ordering

- **Technologies:** MongoDB, Express.js, React.js, Node.js, Stripe, Cloudinary, Mailtrap
- Integrated Stripe Payment API to handle secure end-to-end transaction processing, supporting real-time payment confirmation and order validation.
- Leveraged Cloudinary for cloud-based avatar image upload, transformation, and optimized media delivery across user profiles.
- Configured Mailtrap SMTP service to automate password reset email workflows with tokenized secure links and expiration handling.
- Architected RESTful APIs covering the full order lifecycle — cart, checkout, payment, and status tracking — with JWT-based route protection.
- Crafted a dynamic UI with Redux-powered state management ensuring consistent data flow across components.

## PROFESSIONAL EXPERIENCE

### MERN Stack Intern

July 2024 – September 2024

Webstack Academy

Remote

- **Project:** Food Ordering Web Application
- **Technologies Used:** MongoDB, Express.js, React.js, Node.js
- Implemented interactive menu browsing and cart features using React.js component-based architecture.
- Integrated middleware for login verification, payment processing, and order workflow automation.
- Structured and optimized MongoDB collections for scalable storage and efficient query retrieval.

## EDUCATION

### NSHM Knowledge Campus Durgapur

West Bengal

Bachelor of Technology in Computer Science | CGPA: 7.4

July 2021 – June 2025

### Kendriya Vidyalaya Maithon Dam

Jharkhand

Senior Secondary (Class XII) | 80.4%

May 2019 – March 2021

### Kendriya Vidyalaya Maithon Dam

Jharkhand

Junior Secondary (Class X) | 79.6%

April 2018 – March 2019
